The Schiedel Isokern Garden Fireplace is the ideal solution for outdoor living.

This stunning focal point for any garden is available in 3 sizes and is delivered in a complete packaged solution.

The natural volcanic pumice (sourced from the Hekla Volcano in Iceland) gives this outdoor fireplace all the insulation needed to have a safe and spectacular centre-piece in any garden. The relatively small footprint also means that it can be placed against any wall, even in small gardens or yards, where space is at a premium.

The kit includes the chimney blocks, the lip glue for assembly, firebricks and also firebrick mortar and a render to either seal the joints or give an entire rendered finish.

The Garden 500 model comes with a log retainer and barbecue grill (additional log stores are available as extra). The 950 and 1200 models can have a log store as an additional extra.

This makes the Garden Fireplace the only choice for outdoor heating and living, from the leading experts in chimney solutions.

LOG RETAINER &
BARBECUE GRILL
FREE
WITH 500 MODEL!

500 MODEL

This version can function in any size garden as you can have it with or without the side log stores.

The 500 model comes with a FREE Log Retainer and a Grill to allow it to become a superb barbecue, as well as a stunning Garden Fireplace.

Additional chimney blocks can be added to increase the height.

Opening
510mm w x 540mm h
Inside depth is approx
315mm after firebricks and
the outside overall depth is
440mm

Weight 460kg
1 Pallet Delivery
Code 169566

We recommend a 100mm thick concrete (or similar material) base as the completed build is very heavy and could sink or slant if the base is not strong enough.

950 MODEL

Our most popular model as it's easy to build and fully load bearing, like all the Garden Fireplaces. Our mid-range model is ideal for all garden sizes and can be freestanding, raised, or built against a wall.

Includes FREE Log Retainer.

Additional chimney blocks can be purchased to increase the height.

Opening
940mm w x 720mm h
depth is 640mm

Weight 960kg
1 Pallet Delivery
Code 169567

We recommend a 100mm thick concrete (or similar material) base as the completed build is very heavy and could sink or slant if the base is not strong enough.

1200 MODEL

Our largest Garden Fireplace is a spectacular addition to your garden.

A wide open fireplace built with volcanic pumice, makes this the envy of any garden lover.

Includes FREE Log Retainer.

Additional chimney blocks can be purchased to increase the height.

Opening
1180 w x 720mm h
depth is 640mm

Weight 1100kg
2 Pallet Delivery
Code 169568

We recommend a 100mm thick concrete (or similar material) base as the completed build is very heavy and could sink or slant if the base is not strong enough.
