

Two-Tier bike rack system model VarioHub

**Resolves your parking problems!
Doubles the amount of spaces in the same area.**

- Extremely robust, corrosion-resistant, durable steel construction.
- High-quality aluminium guide rails.
- Ideally suited for permanent use in public spaces.
- Lateral bike spacing adjustable at any time through flexibly adjustable sliding guide rails (recommendation: 500 mm).
- Space-saving parking of bicycles through alternating high/low setting.
- Infinitely extendable number of parking places (in sets of 4 spaces).
- Leaning hoops and wheel holders individually adjustable; suitable for all frame sizes.
- Minimum effort required to store bicycles through robust lifting aid (gas struts).
- Guide rail and wheel holders suitable for tires up to 55 mm.
- Optimal antitheft through multiple locking possibilities.
- For single or double-sided parking.

COMFORTABLE HANDLING
Lifting aid with gas struts.

VARIO HUB

Ideal use of existing space.
Dimensions:
Storage depth 2700 mm,
Height 1400 mm.

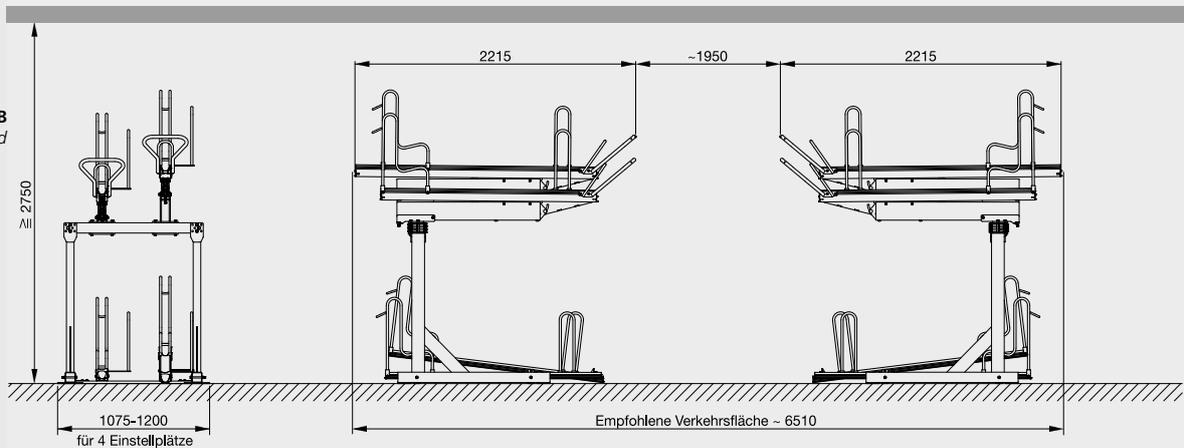

Secure parking and multiple locking points to wheel and frame.

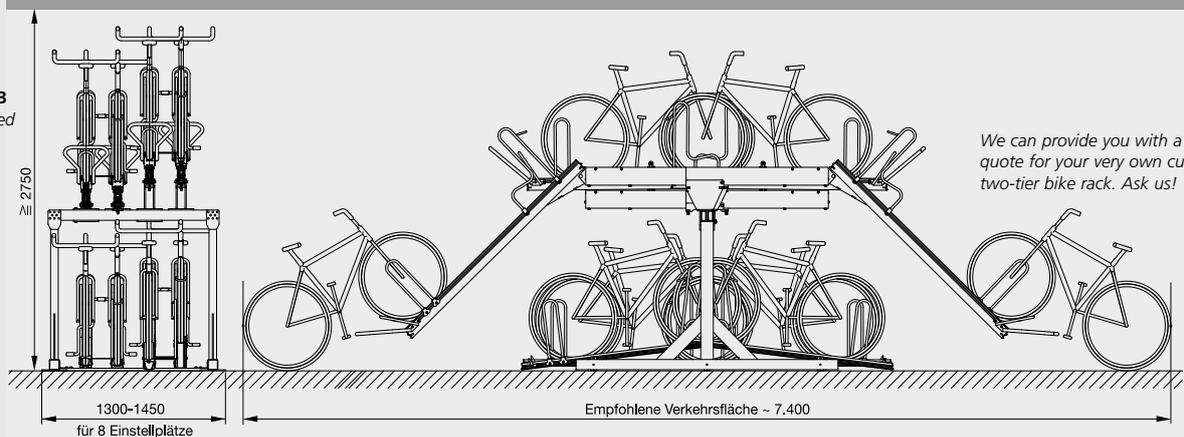

Easy parking of bicycles with very little effort required due to its push and swing function.
